Advice Notes:

Not every potential site will meet every criterion, however all potential Local Green Space sites must meet the following criteria in the checklist:

- 2.1 Not have an extant planning permission within which the Local Green Space could not be accommodated;
- 2.2 Not allocated for development in the relevant Neighbourhood Plan, unless it can be shown that the Local Plan housing allocation is not strategic and can be re-located somewhere else in the neighbourhood plan area; or alternatively that the Local Green Space could be incorporated within the site as part of the allocated development;
- 3.2 “local in character”;
- 3.3 Not an “extensive tract of land”;
- 5 in “proximity to the community it serves”; and
- 6 “demonstrably special to the local community”;

All potential LGS sites must meet at least one of the following criteria in the Checklist;

- 7 “particular local significance ... because of its beauty”;
- 8 “particular local significance ... because of its historic significance”;
- 9 “particular local significance ... because of its recreational value”;

- 10 “particular local significance ... because of its tranquillity”;
- 11 “particular local significance ... because of its wildlife”; and
- 12 “particular local significance ... for any other reason”.

The NPPG places emphasis on early consultation with landowners and consideration of property management if land is to be designated as LGS. The questions in 13 seek to establish the extent to which these matters have been considered and whether these might give rise to additional obligations and whether they might place an unacceptable burden on the landowner. If so, would a partnership agreement or other mitigation measures be appropriate?
