	<p>Yes - Together with the recreation ground, these allotments are the principal green spaces within the settlement of Whyteleafe.</p> <p>The TDC Open Space Assessment (2015) states: TDC use the national standard of 0.125 hectares per 1,000 people.</p> <p>The primary purpose of allotments is to provide opportunities for people to grow their own produce as part of the long-term promotion of sustainable growth of food. In addition to their primary purpose allotments can provide a number of wider benefits to the community. For example, offering an alternative active pastime to participation in formal sport, particularly for older residents. This is particularly important in light of the ageing population in the District. Another benefit is the promotion of social inclusion by bringing people together.</p> <p>In addition to their social value, allotments also benefit the environment in a number of ways. They provide valuable green spaces within towns and cities making them more environmentally friendly, sustainable and attractive places to live. They can also provide a varied and valued habitat for wild plants and animals.</p> <p>In that document 33% of Tandridge residents said that there were not enough allotments.</p> <p>The Community Allotments are well used and their loss would be greatly felt.</p>
5	<p>Evidence to show that “the green space is in reasonably close proximity to the community it serves”?</p>

6.2	Evidence of support from community leaders <i>e.g. letters of support from Ward Members; County Councillors; MP etc.</i>
6.3	Evidence of support from Parish or Town Council <i>e.g. letter of support; Council minutes</i>
	The Neighbourhood Councils that make up the CR3 Neighbourhood Plan Group have all signed a letter of support for the Neighbourhood Plan and the policies within it. This includes support for the Local Green Space proposals.
6.4	Evidence of support from other groups <i>e.g. letters of support from organisations such as Campaign to Protect Rural England; local amenity societies; local schools etc</i>

9.1	Is this criterion relevant to this site? ((Yes /No)
	<p>Yes – Together with the recreation ground, these allotments are the principal green spaces within the settlement of Whyteleafe.</p> <p>They are well used and greatly valued by the community. The social, health and other benefits of a community growing its own food locally are well recognised.</p> <p>Although Whyteleafe Parish is surrounded by open countryside, the settlement is in a tight urban corridor. The green spaces along Church Road together form a quiet semi-rural corridor and are part of a Neighbourhood Character Area in the Plan.</p> <p>Whilst this space is sited within the Green Belt, Local Green Space designation allows the value of these places as community assets to be recognised and safeguarded for future generations, should that boundary change.</p>

	Yes – if holder of an allotment
9.4	<p>Is the site used by the local community for informal recreation? If so, since when? <i>e.g. dog walking; sledging; ball games etc.</i></p>
	No

12.1	Is this criterion relevant to this site? (Yes/ No)

12.2	What are the other reasons why the site has a particular local significance for the local community?
13	Landowner consultation and property management
13.1	The questions in section 1 seek to establish landownership and whether there is landowner support for LGS designation. The NPPG advises that the qualifying body (in the case of neighbourhood plan making) should contact landowners at an early stage about proposals to designate any part of their land as Local Green Space. (Paragraph: 019 Reference ID: 37-019-20140306, Revision date: 06 03 2014). (i) Please confirm when this proposed LGS was first identified and; (ii) When and how the landowners were notified
	(i) Site identified for Reg 14 consultation in 2016
	(ii) Letter
13.2	Have property management considerations been discussed between the landowners and Qualifying Body. If so when?
	No
13.3	Would designation place any restrictions or obligations on landowners? If so, is there a risk that these may be unduly onerous? Where appropriate, have migration measures been considered? Please provide details.
	Yes – see response from TDC.
13.4	Who will manage the Local Green Space after designation? <i>Please provide details.</i>
	TDC

Advice Notes:

Not every potential site will meet every criterion, however all potential Local Green Space sites must meet the following criteria in the checklist:

- 2.1 Not have an extant planning permission within which the Local Green Space could not be accommodated;

- 2.2 Not allocated for development in the relevant Neighbourhood Plan, unless it can be shown that the Local Plan housing allocation is not strategic and can be re-located somewhere else in the neighbourhood plan area; or alternatively that the Local Green Space could be incorporated within the site as part of the allocated development;
- 3.2 “local in character”;
- 3.3 Not an “extensive tract of land”;
- 5 in “proximity to the community it serves”; and
- 6 “demonstrably special to the local community”;

All potential LGS sites must meet at least one of the following criteria in the Checklist;

- 7 “particular local significance ... because of its beauty”;
- 8 “particular local significance ... because of its historic significance”;
- 9 “particular local significance ... because of its recreational value”;
- 10 “particular local significance ... because of its tranquillity”;
- 11 “particular local significance ... because of its wildlife”; and
- 12 “particular local significance ... for any other reason”.

The NPPG places emphasis on early consultation with landowners and consideration of property management if land is to be designated as LGS. The questions in 13 seek to establish the extent to which these matters have been considered and whether these might give rise to additional obligations and whether they might place an unacceptable burden on the landowner. If so, would a partnership agreement or other mitigation measures be appropriate?
